In this report I would like to give ^{lex.} attention to the school museum's ~~non-~~ ~~effective~~ use problem, explain why it is not used effectively and recommend some solutions to solve this ^{issue} ~~problem~~.

Our school museum is a small ^{room} place situated on the first floor of ~~our~~ ^{the} school. There are a lot of historical objects there, as well as a ^{lot} ~~plenty~~ of information about the history of Russian Federation in the 20th-21st century. All objects are inside the glass for students to observe. Gr. lex.

However, with a large amount of historical information and objects, our museum ^{resources are} ~~is~~ not used effectively. There are several reasons why. Firstly, our museum is lack of technologies ^{and objects}. Secondly, the information is written mainly for high-school students, so ~~the pupils~~ ^{while} from other 1-4 forms ~~it~~ will be bored ^{from} reading it. Lastly, our museum is open only on Friday, ~~which~~ ^{so} ~~it is not popular~~ so students ^{do not visit} ~~will not go to~~ a rarely-opened museum. it often. Gr. WD

So, I have some recommendations to make the museum more popular. Firstly, there should be ~~some~~ ^{more} electronic devices inside it, for example, tests for reviewing ~~it~~ on tablets for reviewing historical facts. ~~Information~~ ^{facts}. Secondly, the information should be understandable for the ~~the~~ ^{person} of any age, so it should be written in a simpler language. Lastly, Head teacher ought

to open

Gr.

to open the museum keep the museum opened all week, to help it to ~~become~~ ^{att} to be visited by more students, more popular.

I believe ~~These~~ ^{this} report is ~~believed~~ ^{leg.} ~~to be seen as fast as possible and~~ ^{In the end,} ~~it is~~ ^{hoped} that ~~any~~ ^{these} recommendations will help our school museum to become more attractive to students.

Writing

Introduction

The aim of this report is to outline the reasons why our school museum is not used in an appropriate way and to give suggestions on the way to raise public awareness about the museum and show students the benefits of using such resources.

How it looks

To start with, the way the institution looks like inside plays a big role, as it might influence the student's engagement. The school museum is rather old and it requires few changes, such as setting new lights. ~~and painting~~ The majority of items are put in the biggest room, which is inconvenient.

The reasons

It is important to make sure that students understand what they see and learn, which is not quite possible in our museum. All the objects are not systematically placed, and children frequently get confused. Besides, ~~there is~~ the information which should be perceived while visiting is not full. There is no guide there, which makes everything difficult to understand.

What we offer

We suggest that rearranging all the stuff which museum contains will be very helpful. In addition, if there were some posters, stating new collections, it would make people willing to study more and use the resources they are offered.

Results

To sum up, several changes will show whether the situation is to become better or not. If what we recommend doesn't help, more surveys will be done to improve everything.

1) Introduction.

Part 5

Writing

I am writing a report, a report, which is considered to be read by the school authorities in order to improve the quality of students' education. The aim of this report is to identify the problems of the school museum and to offer ways to its solutions. The matter is that a large amount of information and objects is not used effectively.

2) Brief description

Our museum contains a lot of resources such as 3d-models, books, a base of presentations and even cartoons. All of this equipment is situated on the ground floor of the building and can be used for free. Children may play interactive games, read articles, discuss topics here in a comfortable interior without any drawbacks. However, there are some challenges we meet that should be ~~canceled~~ solved as soon as possible.

3) Short breaks

To begin with, I want to mention the main problem. ~~In my opinion, I suppose pupils probably do not have enough free time to visit the place. Their heavy schedule includes 5-10 minutes of rest after each lesson which are spent on eating or communicating with each other. And then we usually have extracurricular activities so it is not always a good idea to go to the museum after lessons classes.~~
In my opinion, we can get rid of the problem by increasing the time of the breaks.

4) Shortage of curiosity

The second reason why the museum is not attended as often as it wanted to be is that children are not interested or aware enough. I mean that pupils do not ~~want~~ desire to spend ~~can will be able to~~ their time getting new knowledge. I believe we ~~would~~ ^{deal with} solve this difficulty by improving our advertisement and organisation. The idea is to invite adults and students from other schools ^{as well} and to develop our ^{accounts on the} social networks.

5) Conclusion

I hope for future cooperation and have a strong faith in our common success.

Part 5

Writing

In this report I would like to discuss the using of school's museum resources. lex

As you know, our school's museum is about the history of space travelling and space exploration. The museum is full of articles and texts about space. There are even a few miniature models of spaceships and planets. Gr.

I don't think these objects and information are used effectively. Firstly, the articles and texts about history of space exploring are too boring even for highschool students. There are too many difficult words and descriptions which can be understood only by those who already know a lot about space travelling. Secondly, there are only a few models of things related to space. They are simply not interesting to look at too. Gr. Sp.

I think our museum resources could be used a lot more effective. For example, we can add some more interesting and interactive models. It would help even children to take part in exploration of the museum. Also, we can make students and teachers who are really into history of space travelling tell other students about interesting facts from the space and much more. Gr.

In conclusion, I would like to say that if you use my recommendations on improving our school's museum, it would involve much more students in using the museum resources for their education. Also, it would increase the number of people visiting our museum.

Part 5

Writing

Today, I'd like to tell you about a problem in our school. ~~we~~ ^{me} and my classmates recently discovered. Basically, the problem is simple: our school museum is not used effectively by the students. But let me describe the museum first.

Our school is huge, it includes three buildings. One of them is the museum. It has two floors, more than twenty rooms and even a special room with some equipment such as microscope.

So we managed to point out two main reasons why the museum is not used effectively. First, children in primary school simply don't have an access to it. We believe, it wasn't that reasonable to restrict the access for kids. Second, students get their assignments online more and more. So they can so, for instance, if they have to do a project, they can simply find it on the Net or elsewhere. This way of doing any assignments is disapproving.

Nowhere are some of our recommendations connected to the previous paragraph. Actually, there are a lot of young children in our school who are really fond of such subjects as history, art, biology. So why don't just let them in the museum (if they want) to learn more about the world. Also, we recommend our students to get less online assignments and more practical ones. We hope it's going to interest students in using museum more. For example, they could use a microscope for some biological projects.

In conclusion, I'd like to say that we really hope students are going to use the museum more effectively.

Writing

Dear Sir / Madam,

I am writing to you with a regard to explain why our school museum is not used effectively despite it ~~has~~ contains a large amount of information and objects.

The school museum looks like a typical museum. It is a massive building. It has different rooms where you can find any exhibit you look for. Also, there are lots of different objects and guides provide information about them.

In my opinion, this museum is not popular because of two problems. First of all, even though ~~there~~ guides provide plenty of information ~~at~~ ^{about} different things I can't say that it is really interesting. Secondly, Excursions are boring. Secondly, Information and exhibits are not ~~related~~ useful for our study. There is no clue to visit this museum to improve your studying knowledge. It expands your knowledge but it will not help you to succeed in studying.

I can recommend to provide more useful information. ~~and make that~~ It will involve students in using the museum resources for their education. It will make museum a good way to ^{expand} ~~improve~~ your studying knowledge. Also, I think you should ~~reduce~~ ^{remove} some objects and replace ^{them} by new ones. I think ~~it can make~~ ^{the} excursion will be

P. Sp

Today I am going to discuss the problem of our museum, and to be exact, why our museum is not used effectively by the students.

To start, our museum ~~is very~~ ^{new is a} large and got a lot of old artifacts of World War II. We've got many Soviet Union soldier helmets, guns and explosives and we also have some Nazi guns. It may sound ~~(very intere)~~ like a very good idea for a museum but now I will tell you why it's not as good as it appears.

First of all, our ^{beautiful} museum is ^{locked} ~~located~~ ~~in~~ behind a small door which from first glance, doesn't even look like a museum entrance. Second of all, ~~most of new student are~~ ~~not even interested in the theme of World War II~~ ~~(you)~~ don't even tell any where that our school got a museum. The only time I remember it being used, is when some students who chose to be historians went there to explore it. I have never seen you do some excursions to it.

So that's why I will give some ideas how to improve effectiveness of our museum. Firstly, ~~make the entrance (look)~~ label the door so people know it's a museum. You can also put some announcements across the school so people would at least know. Secondly, make some excursions to students. Maybe they will become interested in this theme and come there more frequently.

Anyways, I know that you always try to make our school better, but please, look at already existing stuff in our school. Thank you for reading.

The museum class is one of the most interesting places in our school. But it has one major problem: this large amount of information is not used effectively by students. And we want to talk about it.

The school museum is separated on the first floor, near the library and gym class. For a very long time this cabinet contained a full information about not only different historical events, but also about our school and students who used to learn here before. There are many astonishing and mindblowing diagrams that will amaze you and give you a chance how the war was happening.

Now me and my classmates discovered a few problems how everyone just forgot about this place. Firstly, we found that there was a group of students who took care about this place. After they graduated, the museum was forgotten. Secondly, the resources of the museum started to be used for another options. The historical objects lost their responsibility.

After analyzing these facts, our team imagined two ways to increase public access to the museum. The first one is remaking of the cabinet. The second one is creating a new volunteer group to take care about this class.

All in all, we want to say, that the school museum needs to be reinvented, because if students fully forget about it, this place ^{will} just dies.
