Educational process is very long and difficult. There are many ways how to do studying easier and one of them is visiting museums. There is a museum in our school but it is not used effectively by the students and I have volunteered to analyze the situation.

Our school museum is situated on the first floor. It contains a large amount of scientific information and different objects such as ancient animals' bones.

Anyway, our museum is not used effectively by the students. I think there are too much ~~useless~~ useless information. Besides, visitors can not touch the objects so there is no point in keeping it in school museum.

In my opinion, to improve the museum the school authorities should remove all useful information, for example, texts about ~~the cities where~~ people who lived in cities where some of the ancient animals were born. ^{Moreover,} the school authorities should allow touch the objects so students can do biological researches based on the type of, for instance, animals' ~~soft~~ skin: if it is soft or not. This also can ^{increase} ~~interest~~ more public access to the museum.

In conclusion, ~~I think~~ the I strongly believe that the museum is very important for the students and the school authorities should improve it to involve more students in using the museum resources for their education.

Seeing last statistics of the attendance of students to museums is actually upsetting, since you can find a large amount of information there. So let's discuss the main reasons of it and possible solutions.

Let's have a look at school museums and analyze the situation. As for the start, I want to say some things about appearance. School museums ^{is} ~~are~~ always a small room that ^{doesn't} ~~don't~~ differ from all others. It looks ordinary and uninteresting. In my opinion, students may just have no idea about its existence. Secondly, the organization of given information also plays a huge role. Often the texts of description are written in a small size and in a big amount. Many young people suffer from the lack of concentration, so it's hard for them to read big pieces of information without ^{distracting} ~~losing~~ / ~~concentration~~. So what can be done to solve this problem? To get more students involved students can make a page for museums in the social networking sites to raise awareness. As for the second solution, I think it would be great if schools had ^C ~~re~~ ~~ab~~ ~~o~~ ~~d~~ ~~e~~ ~~d~~ versions of texts and headphones. The information is getting in the head easier when it is in the audio format.

exp.

sp.

In conclusion, I hope that my ideas would be used ~~em~~ for increasing the attendance to the school museums.

sp. Changes which we need in our school museum.

sp. It is well known fact that only a little amount of pupils visited our school museum. Someone say that there are many useless objects, while other find it boring and not interesting. Well, I am going to look through and examine why it happens. And why school museum doesn't involve students. gr lex

sp. To begin with, I would like to ~~descrip~~ describe our museum how it looks like now. At first, there are a lot of some books, old unright maps and you should must pay to enter it. Secondly, school museum is badly located. It takes five¹⁰⁰ minutes to get there from school. Why not build it ^{inside} ~~at~~ sch. of school? gr

As I mentioned above, there are a lot of disadvantages of school museum. It is not used effectively because it's location and information which is false. Another reason why pupils don't visit it is too rubles ¹⁵⁰ entrance. Some people don't have money to spend on it. They can visit new museum for free. ex

sp. log. Well, what can we do to rise increase public access. Firstly, we should make free entrance. And add charity box, if somebody have odd money, he will donate it. Secondly, we can ^{change} ~~refresh~~ the information and object in museum to new one. And at last, we have a free space room in our school. It will be a good idea to create a school museum there. gr

In conclusion, I would like to say, that we must try to recreate our school museum as well as we can. That is all I want to tell you about changes in our school museum. 267

As our students continue to pursue their educational promess, many of them are having difficulties with using the school museum, so me and my classmates have decided to investigate for why that may be an issue.

ex

OT

OT

OT

Our school museum is located on the first floor, and despite its relatively small ⁵⁰size, it still boasts a large amount of information, having per let's say the entire history of a class, comfortably set onto a single shelf.

OT

We believe that may be one of the main factors that deters many students from using it, as there's a ^{margin} ~~lot~~ of unusable and unnessecary information ¹⁰⁰clumped up together.

ex

Our recommendations would be moving the ~~lot~~ ^{and} unneeded information to the archives, giving space to newer, much more significant ^{nealy} history, as well as making sure just how much information is outdated.

ex

Overall, our school museum is home to the stories of many, ¹⁵⁰stories that need to be shed light upon, ^{to be looked at by newer generations, in pride} however we must let go of the past to open a new chapter, and give a head to the stories others may hold within themselves.

OT

Our school museum demonstrates the ups and downs of studying, ²⁰⁰how one should study and learn from mistakes.

And figuring out how to be a better human being.

gr Today, My classmates and I want to
analyze, and write about the current
situation that related to our school
museum. In our opinion the museum
sp. recourses and objects are not used
fully and students are not using the
information from museum in the matter of study and
education.

To start with, our museum is very large, it has many
objects and information in there, but in the eyes of student
it all seems dull and boring. We tried to explain this
situation and tell the reasons of why the museum
stuff is not used effectively.

sp. First of all, the information in museum is uninteresting
to students because it has many uselles and unimportant
information. Also the museum doesn't have it own topic,
gr all objectin there are related to different topics, so that
students are puzzled by the variety of knowledeg. We
have some recommendations about how we can improve
the situation.

gr Firstly we need to brighten up the information,
make it unique and interesting. Secondly, we need
make museum related to one topic, for example
physis or history.

sp All in all, we believe that all of us can
improve the situation, all we have to do is just
be supportive, creative and most importantly
make efforts to increase public access to
museum.
